

Ground Transport Plan

Planning for the safe and efficient movement of people and goods to and from and around the airport is a key part of our future planning. To this end, the 2022 Master Plan includes a Ground Transport Plan.

The plan continues the development of a long-term solution to address traffic congestion during peak periods that occurs on the existing road network. The plan also outlines opportunities to increase public transport use, enable bicycle riding and measures to manage travel demand.

By delivering these actions, transport access options to the airport over the Master Plan period will significantly improve.

INTERNAL ROADS

Further enhance and expand the internal road network

ENHANCE SAFETY

Improve the safety and functionality of the passenger dropoff, pick-up and car parking areas

EXTERNAL ROADS

Work with the Victorian Government in planning the external road network

FUTURE RAIL LINK

Work with the Victorian and Commonwealth Governments to deliver the Melbourne Airport Rail project
