

MELBOURNE AIRPORT'S NAARM WAY STAGE 2

New pick up. New drop off.

Arriving Spring 2026

The biggest change to Melbourne Airport's road network in its 56 year history is coming later this year.

The Naarm Way project will change the way you pick up and drop off to help make journeys smoother and more streamlined.

Later this year, the new free and expanded Pick Up and Drop Off zones for passengers using Terminal 1 (Qantas Domestic), Terminal 2 (International) and Terminal 3 (Virgin Australia) will open in the T123 Transport Hub.

There'll be a new dedicated exit from the Tullamarine Freeway, which will take passengers directly to the T123 Transport Hub.

Level 3 of the T123 Transport Hub will become the new dedicated Drop Off zone, providing more than 70 vehicle spaces.

Level 2 of the T123 Transport Hub will become the new dedicated Pick Up zone, with spaces for more than 100 vehicles.

A new 19 metre wide pedestrian bridge will provide direct passenger access from the T123 Transport Hub to the terminals.

The new Pick Up and Drop Off zones will pave the way for the expansion of the T2 International Terminal.

There will be plenty of support on hand to help guide everyone through the changes.

Thanks for your patience while we're building your airport.

Project benefits:

- the new Pick Up and Drop Off zones will allow for the expansion of the International Terminal (T2)
- take 70,000 cars off the existing network, improving access to the terminals
- provide convenient, intersection-free access, providing a smoother and more direct route
- support passenger growth
- enhance the city gateway – the new forecourt will create a memorable first impression of Melbourne
