

APAC Safety Policy

**AUSTRALIA
PACIFIC
AIRPORTS
CORPORATION**

Australia Pacific Airports Corporation (APAC) recognises its moral and legal responsibility to provide safe airports. In order to achieve this we aim to maintain the highest practicable levels of safety in everything we do.

The APAC Senior Leadership Team will provide the necessary focus and resources to ensure:

- The achievement of a positive safety culture that encourages mutual trust and open reporting of safety issues
- Safe work environments and public areas
- Safe plant and equipment
- Safe systems of work
- Effective consultation and communication on safety matters
- Adequate instruction, training and supervision to ensure safe operations
- The APAC Safety Management System (SMS) is implemented, continuously improved and integrated with other APAC management systems.

All Managers are required to establish clear safety objectives for each part of the business and to set measurable targets in order to monitor progress of our safety efforts.

Our safety commitment extends to ensuring that our operations do not place the airport community at unnecessary risk of injury, illness or property damage.

We expect all our people to help us maintain safe operations by:

- Recognising that personal behaviour is fundamental to the achievement of positive safety outcomes
- Escalating any safety concerns immediately to their respective supervisor
- Working safely and only undertaking tasks they are trained and authorised to carry out
- Understanding and implementing our SMS
- Report any safety issues
- Remaining vigilant about safety at all times
- Complying with current legislation.

We will consult with all our stakeholders in our efforts to continually improve the level of safety and compliance with all work health and safety laws and requirements.
